PRICES REDUCED

In line with lower prices of labor and most every line of goods, we have reduced our prices on many items in this list from 10 to 50%. This will allow a smaller income to still cover cost of roots, bulbs or plants to beautify the home grounds.

Our 50 acre farm is two miles due north of the Court House on the paved Jefferson Highway (No. 1) which passes through our farm and past our home and gardens.

We sell thousands of pansy plants and cut flowers including tulips, iris, peonies, gladiolus, delphiniums, etc. Our first peonies, *Officinalis Rosea* and *Officinalis Rubra* bloom in time for Decoration Day. our late ones, *Etta*, *Rubra Superba* and *Grandiflora* and sometimes *Marie Lemoine* last until July 4th to 6th, so we have peonies continuously for about six weeks. Our first gladiolus open just when the last peonies are done and last till October.

Our easily worked sandy loam soil produces won-

derfully clean peony roots as well as fine iris roots and gladiolus bulbs.

We know the quality of our peony and iris roots will please you for they are as fine and clean as can be grown anywhere.

HOW TO PLANT PEONIES

Set so eyes are not more than two inches below ground level. Pack soil well around roots but not too much around eyes. Cover first winter (after ground is frozen solid) with 3 to 4 inches of straw or litter or throw 2 or 3 spadeful of dirt over the spot where peony is planted anytime before ground freezes. Remove straw or dirt early in April.

WHEN TO PLANT

September 15 till ground freezes in November. I consider October the best time to plant as then they usually bloom the first season. I do not advise spring planting unless done very early.

SUBSTITUTION

Never except with your permission.

OUR GUARANTEE

We guarantee all roots true to name, but in any business a mistake is possible. If a customer receives a root from us that blooms untrue, we gladly send a true one, and you may also keep the mistaken one.

SIZE OF ROOT

Careful experiments prove to us that the natural division with 3 to 5 eyes is the best size to plant. Such divisions trimmed back as we trim them before shipment will in three years give a fine large plant with nearly all new root growth that is superior to a small division or a large clump.

HOW WE SHIP

We prepay postage or express on all peony shipments in the U. S. or Canada on orders of \$5.00 or over. On less than \$5.00 orders we will prepay

postage if 10c, for each peony root is sent. Otherwise orders will be sent by express, charges collect.

PRICES AND DISCOUNTS

Net cash before shipment. A deposit of 25 per cent will hold order till September 15, when balance is to be paid. When all cash is sent with order \$11.00 worth of roots may be selected for \$10.00; \$30.00 worth for \$25.00; \$65.00 worth for \$50.00; \$135.00 worth for \$100.00. No discounts can be allowed on collections as they are always quoted at reduced prices.

HOW TO REMIT

Send remittance by post office order, express money order, check or bank draft to C. H. Smith, Box 427, Faribault, Minnesota.

Ratings are based on 100 being perfect. The name or abbreviation of the originator is given in parenthesis following the variety name. (B) Brand, (Cr.) Crousse, (K) Kelway, (L) Lemonine, (D) Dessert, (F) Franklin.

The above collections are real bargains. All roots included in them are regular size 3 to 5 eyes. Most of them have already been reduced in price this year so that with the further reduction in collections we know our prices are as low as first class stock can be bought from any reliable grower. And remember we pay postage or express if your order is \$5.00 or more.

SEEDLING PEONIES

In 1923 we sowed our first peony seeds. The resulting plants have been blooming for 3 and 4 years. In 1924 we bought over 500 hand pollenized transplanted seedlings that had bloomed that year, most of which we divided. We now have lots of fine ones with new ones coming on and shall tell you more about them next year.

IRIS

Orders of \$1.00 or more postpaid except as noted.
Just be sure they are planted where water will

run off quickly. They can stand all kinds of hot weather with good drainage. Pack soil well around roots but do not cover rhizome (the fleshy part of root) more than about 1-2 inch with soil. May be planted any time ground is not frozen, but best time is August.

The standard (S) is the upright part of the flower and the falls (F) the lower part.

TULIPS

Tulip bulbs should be planted in October or early November about 4 inches deep where the drainage is good. They enjoy a sandy loam soil, but will do well on heavy soils if planted where melting snow will immediately drain away. When ground is frozen solid cover with 2 or 3 inches of straw or litter, which should be removed early in April.

They may be left in one location for several years or may be dug each July, stored thinly in a cool dry place and again planted in October or early November.

The tulip bulbs quoted below are all No. 1 size, imported bulbs that will give the largest blooms under good conditions.

CROWN LILIES

This lily is a species of Elegans. It is bright orange red, blooms in June, with a cluster of 5 to 12 beautiful blooms on the crown. It attracts atten-

tion of all visitors at once. May be planted in fall or spring and always blooms freely the first season. Large bulbs, 3 for \$1.00; Doz. \$3.00, postpaid.

REGAL LILIES

Circumference 5 to 6 inches. Plant fall or spring. 5 for \$1.00; Doz. \$2.00, postpaid.

DELPHINIUMS

Belladonna, light blue, 2 year clumps, fall or spring shipment each 30c; dozen, \$3.00. Early August 1931 seedlings for shipment in April and May, 1932, will bloom from July till November. 3 dozen \$1.00.

Hybrids, Wrexham strain, also 3 dozen \$1.00.

PANSY PLANTS

We grow thousands of Pansy plants and sell both wholesale and retail. America is the very finest strain of pansies on the market. In size, variety and brilliance of colors they are unequalled. Strong plants in bloom in April and May. 2 doz. for \$1.00 postpaid.

Young pansy plants for October planting that will bloom next spring. 5 doz. for \$1.00, postpaid.

GLADIOLUS

I grow more than 150 varieties of gladiolus. My new free price list will be ready in January 1932, ask for it.

A CLOSING WORD

Give me a trial order this year. My blooming peonies and iris were admired by thousands of people in June from many states. Some made special trips of hundreds of miles on the advice of their friends just to see them and told us they were glad they came and left us orders for fall shipment which proves they were pleased.

I give careful, personal attention to and pack every order. I divide all peonies my self priced at \$2.00 or more. I shall do everything humanly possible to please you. On this basis I solicit your orders.

Yours for fine flowers,
C. H. SMITH
